### **Pinnacle Road Improvement Project Newsletter**

May 16, 2014

This informational newsletter is being distributed to provide updates on the status of the project and communicate upcoming activities to effected properties and interested parties.

#### **Project Description**

The limits of the project on Pinnacle Road are from the Rush-Henrietta Town Line to Red Lion Road South. In the section from the Rush-Henrietta Town Line to I-90, the project will install new 5 foot paved shoulders along the road. We will also install new storm sewer systems and re-grade ditches along the road, as well as, recycle/rejuvenate the top layer of existing pavement and then overlay the entire roadway width with an asphalt top course. This is similar to what was done on Pinnacle Road in the town of Rush last year. From I-90 to Red Lion Road we will mill and resurface the existing roadway.

#### **Current Project Status**

The work for the Pinnacle Road project is scheduled to begin on or about **May 27, 2014**. The project will start with the installation of new storm sewers, and re-grading of ditches along the road. During this time, the County will also recycle/rejuvenate the top layer of asphalt. Then we will construct the new 5 foot shoulders along the road and mill the section north of I-90. We will then pave a layer of asphalt along the entire project limits of Pinnacle Road. We will finish the project with the installation of new mailboxes, along with topsoil and seeding of disturbed lawn areas near the road.

Near the start of our project, you may also notice that RG&E Electric and Frontier Telephone will be performing some tree trimming and relocating some utility poles along the road.

#### **Overall Schedule**

The current schedule is to have this project completed this fall.

#### **Project Contact Information If you have questions:**

Full time inspection staff is on site daily working with the contractor. If you have an emergency, question or concern regarding the work in progress or other circumstance, please contact our Resident Engineer at the number below.
